

Sprint Plan 1 - CMPS 115 - Software Methodology

Document Name: Sprint 1 Plan

Product Name: Driving Tracker

Team Name: Drifting Coders

Sprint Completion Date: October 16th, 2015

Revision Number and Revision Date: 1.0 / December 4th, 2015

Goal:

For Sprint 1, we would like to create the bare bone UI for our project. It would include the main page, which will have links to the following pages, table to display the user and friends' data (amount driven or amount owed), event page to list out all the attendees for carpooling, and input page to record how the driver has driven.

Task listing, organized by user story:

User story 1:

As a user, I would like a main page to see the overall functionality of the application, so that it would be easier to use.

Task 1: Design page (30 min)

Task 2: Code the text on to the app - username, icon, log, friends, event sign out(3.5 hours)

Task 3: Code the buttons on the app - isng out, log, friends, event(2 hour)

Task 4: Code the background(1 hour)

Total hours: 7 hours

User Story 2:

As a user, I would like to view a table that lists how much my friends and I have driven, so that I can easily see the distribution of driving.

Task 1: Design page(1 hour)

Task 2: Table that displays all driving information(4 hours)

Task 3: Creating the back button to go back to main page(1.5 hours)

Total hours: 6.5 hours

User Story 3:

As a user, I would like to be able to create a login screen, so I can hold my personal information

Task 1: Design start page(1 hour)

Task 2: Design the create account page(1 hour)

Task 3: Create the text of sign in page (1.5 hours)

Task 4: Create the buttons for sign in page(1.5 hours)

Total hours: 5 hours
